

Assignment No. 2

Subject: Database Engineering Lab (7CS271)

Class: SY CSE, AY 2025–26, Sem-II

Title: Study of Entity-Relationship (ER) model.

CO: CO2

Name - Atharv Vinayak Kulkarni

PRN - 245109074

Batch - S5

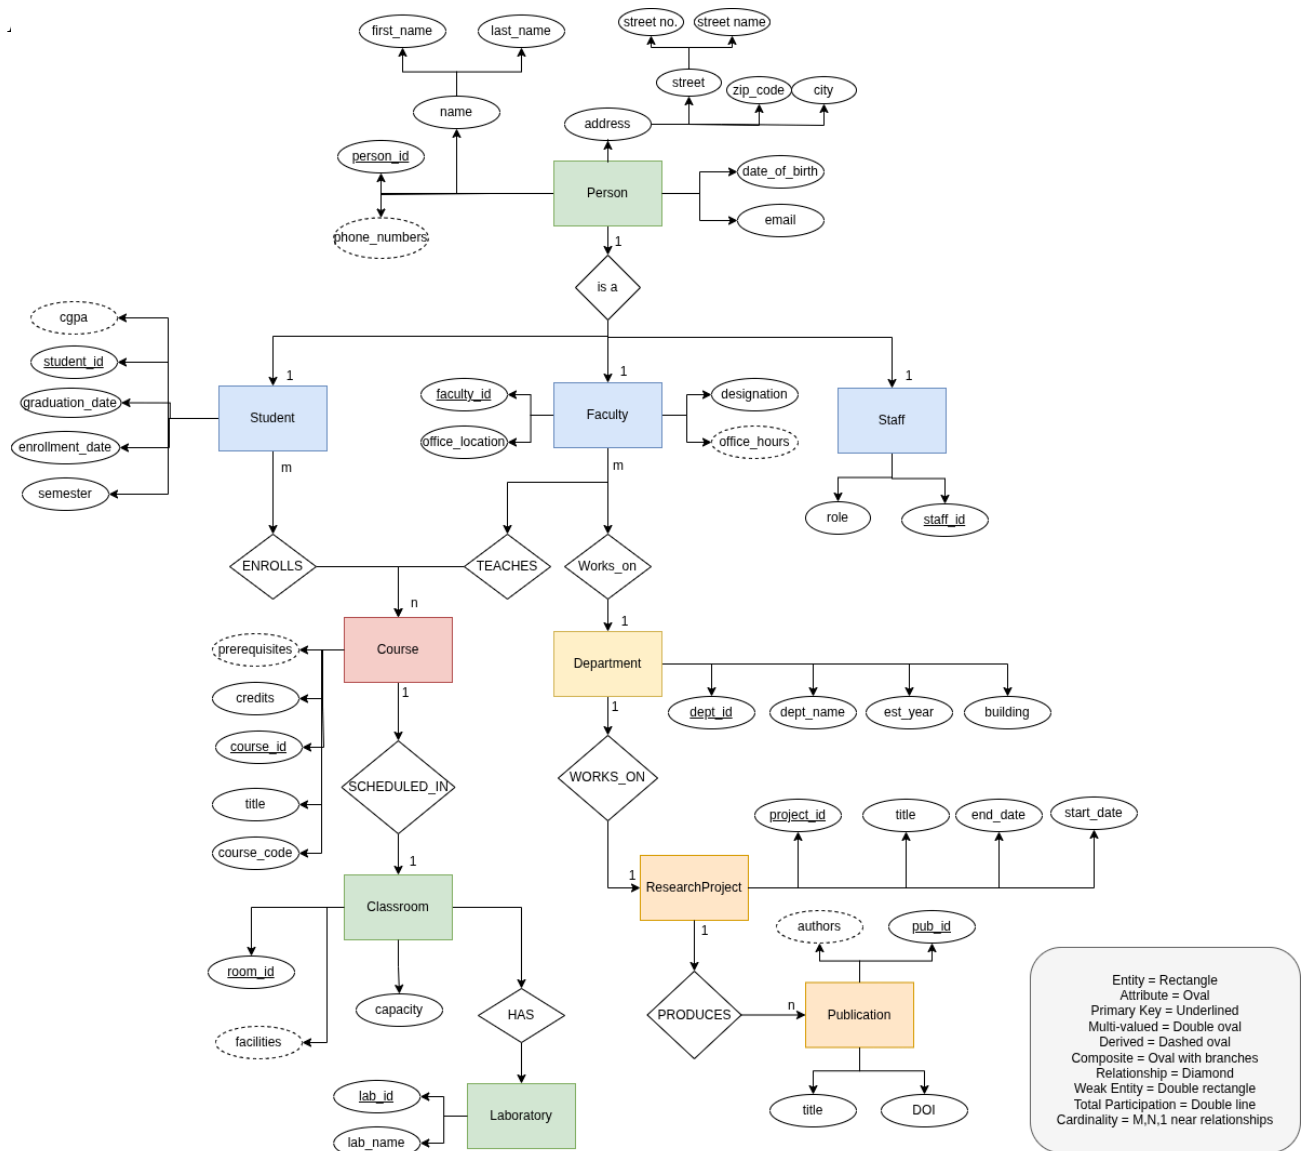

Problem Statement -

Smart University Academic, Research & Administration System (SUARAS)

The university wants to implement **SUARAS**, an integrated system to manage:

- Academic structure, accreditation, and curriculum
- Students, faculty, research scholars, and staff
- Course delivery, enrollment, assessments, grading, and attendance
- Research projects, grants, publications, and patents
- Infrastructure: classrooms, laboratories, equipment

The system must support academic operations, research lifecycle, and administrative controls, while enforcing data integrity, security, and consistency. Construct an ER diagram for above university which will meet all the criteria.
